Having 4.8 Years of Experience in SAP PO 7.5 and SAP CPI.

Professional Summary:

- Expertise in working with SAP CI tools (Discover, Design and Monitor).
- Experience in developing custom interfaces with SAP CPI using various CPI palette-mapping objects like filters, content modifiers, splitters, Content Enricher, PGP Encryption, Splitter, groovy scripts, multicast, join and gather etc.
- Configured HTTPs, Soap, OData, JDBC, SFTP, Process Direct adapters in CPI. Experience in process call, Local integration process, exception sub process and message mapping
- Implemented cloud to cloud and cloud to on premise integrations using CPI and cloud connector.
- Worked XML conversion to Json and CSV, CSV to XML Conversion, XSLT, Groovy Script, Content modifier with Header and Property variables.
- Good working relationship with functional and technical project teams, problem solving skills and good capabilities in analysing complicated business process and technical development.
- Experienced in Communication and working closely with Offshore/Onsite teams.
- Excellent communication skills, team participation, inter-team co-ordination, and team leadership abilities.
- Knowledge on APIM.
- Created Technical specifications, test cases and documentation for the requirements during the implementation.
- Experience with Integration Builder Repository in Design (Interface objects, Mapping objects) and Configuration (Integration Scenario and Integration Process), to develop all the required objects for the Application Integration.
- I have Strong skills in standard PI adapters, IDOC, FILE, JDBC, MAIL, SOAP, SFTP, REST, JAVA PROXY adapters.
- Extensively worked on all the NODE FUNCTIONS.
- Experience on transporting the objects using File and CTS method.
- Worked on projects which adopted Agile and Waterfall methods.

Academic Details:

B.TECH (ECE) from Nimra Institute of Engineering, AP 2015.

Technical Skills:

ERP Applications	:	SAP
Net Weaver Component	:	**SAP PO 7.5,SAP CPI**
Database	:	MS SQL Server, AWS
Project Type	:	Development, , Quality, Production Support
Operating systems	:	Windows Family, LINUX

Professional Experience:

Organizations	• Duration	• Role	• Location
Fujitsu	**Oct 2024 to till date**	**Technical consultant**	**Hyderabad**
Tata Technologies	**April 2023 to Sep 2024**	**Consultant**	**Pune**
Wipro	**FEB 2022 to Dec 2023**	**Software Engineer**	**Bangalore**
Indies Technologies	**Aug 2020 to Feb2020**	**Software Engineer**	**Bangalore**

Awards and Recognition:

- Received an Insta award for efficient handling two major projects from portfolio manager.
- Received an Insta award from Manager on picking up client process quickly.

PROFESSIONAL EXPERIENCE

Project 04

- Client : Fujitsu
- Organization : Fujitsu
- Project Type : Development
- Platform : SAP CPI

Fujitsu is a Japanese multinational information and communication technology (ICT) company, founded in 1935, that provides a wide range of digital services, solutions, and hardware. A global leader in IT services and consulting, Fujitsu offers solutions across industries like finance, retail, and healthcare,

Responsibilities:

- Understanding the functional requirements, analyzing the functional specifications, and lead UAT and Production cut over activities.
- Defining and designing of Iflows using adapters like ODATA, HTTP, SOAP, IDOC, Process direct, Mail in CPI.
- Worked JSON and XML conversions, Groovy script, Content modifier, request-reply, multicast, router, process call, Local integration process, exception subprocess.
- Used message mapping, XSLT and content modifier for transformations.
- Maintained OAUTH Credentials, Data Store in SAP CPI.
- Good exposure to Cloud Platform Monitor, log, and Trace files.
- Worked with different SAP Systems like SAP E-Commerce, C4C, CDC, ECC and other Third-party systems.
- Involved in Testing during SIT, UAT and GO-Live.
- Knowledge on service now ticketing tool.

Project 03

- Client : Tata Power
- Organization : **Technologies**
- Project Type : Implementation and Support
- Platform : SAP CPI

Tata Power is India's largest integrated power company, operating across the entire power value chain, from renewable (solar, wind, hydro) and conventional energy generation to transmission and distribution, offering solutions like EV charging and home automation. Founded in 1915 by Jamsetji Tata, it has evolved into a leading clean energy pioneer, committed to achieving carbon neutrality by 2045 and driving India's sustainable energy transition

Responsibilities:

- Participate in Requirement gathering calls with Clients along with Internal Business Teams'. Understand the Requirement, Feasibility analysis and appropriate approach for Design solution.
- Worked on different adapters like SFTP, SOAP, JDBC and HTTP.
- Created scenarios for Ariba integration for sourcing event, SFTP to JDBC, HTTP to SFTP, HTTP to SOAP Integrations.
- Worked Content modifier, request-reply, multicast, router, process call, Local integration process, exception subprocess, send,
- Post Development, perform the Internal Testing, debug the scenarios, and then move the Objects to Quality system with appropriate approvals.

Key Responsibilities in Support Project:

- Daily Health check - up of Production system with respect to Monitoring of entire scenarios as per the Production Checklist designed.
- Co-ordinate with Internal teams as well, when certain Instances takes place in Production system and safeguard the Production system.
- Responsible to maintain Overall daily Messages flow which inclusive of Success and failure.
- Checking for the certificates.

Project 03

- Client : National Grid
- Organization : Wipro
- Project Type : Development
- platform : SAP CPI

National Grid is the high-voltage transmission system that transports electricity from power stations to the distribution network, which then delivers it to consumers. It is a network of cables, pylons, and substations. In the context of India, the National Grid is the high-voltage transmission network, while National Grid plc is a company that owns and operates networks in the UK and the US, including high-voltage electricity transmission and gas distribution.

Responsibilities:

- Experience in E2E Integration between SAP S/4 HANA, legacy Systems, and various third-party applications like concur, Coupa, Replicon, Talent link, Workday, Phoenix with SAP PO and SAP CI.
- Worked JSON and XML conversions, Groovy script, Content modifier, request-reply, multicast, router, process call, Local integration process, exception subprocess.
- Used message mapping and content modifier for transformations.
- Worked on different adapters like (HTTP, SFTP, JMS, Mail, OData, Process Direct & SOAP in SAP CI.
- Maintained OAUTH Credentials, Data Store in SAP CPI.
- Good exposure to Cloud Platform Monitor, log, and Trace files.
- Supported various stages of SDLC such PRE-SIT, SIT and UAT using Micro Focus Application Lifecycle Management.

Project 04

- Client : Philips
- Organization : Indies
- Project Type : Development and Support
- platform : SAP PO 7.5

Philips is a Dutch health technology company founded in 1891, focused on improving people's health and well-being by delivering innovative solutions for healthy living, prevention, diagnosis, treatment, and home care. While it was once a large electronics conglomerate known for everything from light bulbs to consumer goods, Philips now concentrates on health technology, including diagnostic imaging and patient monitoring. The Philips brand for lighting products is now licensed to Signify, a separate lighting company.

Responsibilities:

- Responsible for Developing some of the interfaces in PI
- Involving in creating all objects of Enterprise service repository and ID.
- Involved Configured scenarios using Proxy, IDOC, RFC, SOAP, REST and File adapters.
- Daily Health check - up of Production system with respect to Monitoring of entire scenarios as per the Production Checklist designed.
- Ensure to have Production system is up and running with respective Business hours.
- Co-ordinate with Internal teams as well, when certain Instances takes place in Production system and safeguard the Production system.
- Responsible to maintain Overall daily Messages flow which inclusive of Success, Error and Cancelled etc.
- Alert Configuration and configuration
- Archiving and deletion of XML messages
- 24 * 7 PI support
- Host weekly meeting for End to End tracker update with Vendors and business.

DECLARATION

`I hereby declare that the above written particulars are true to the best of my knowledge.
